

## Where did the dinosaurs go?

<u>History</u>			<u>Geography</u>		English		<u>Science</u>	
<p>Dinosaurs were lizard-like creatures that lived on Earth about 66 million years ago.</p> <p>Dinosaurs are now extinct but no one knows for sure how they died.</p> <p>Mary Anning was a palaeontologist. She discovered a complete skeleton of a dinosaur.</p>			<p>The equator is an imaginary line that runs around the centre of the Earth.</p> <p>The countries that lie on the equator are at the closet point to the sun.</p> <p>The Earth is made up of seven continents.</p> <p>A continent is made up of a group of countries.</p>		<p><b>Character descriptions</b> are a type of writing that gives the reader information about a story character.</p> <p>A <b>narrative</b> is a piece of writing that focuses on telling a story. It's a story with a plot, characters, structure, setting, and theme.</p>		<p>A <b>habitat</b> is a home to plants and animals. The habitat must have everything plants and animals need to survive, including water, air, food and shelter.</p> <p>A <b>carnivore</b> is an animal that eats meat.</p> <p>A <b>herbivore</b> is an animal that eats plants.</p> <p>An <b>omnivore</b> is an animal that eats both plants and animals.</p>
